Thanks to the permanent magnet synchronous motor, the frequency converter and the energy efficiency of $EEL \leq 0.18$, as well as the protection class IPX5 and the integrated bleeding plug, the **EVOSTA 2** family ranks as one of the best products in the category in terms of performance and reliability. The range of **EVOSTA 2** circulators is the perfect replacement for old three-speed circulators due to its compact size and all-round performance. The product is also extremely user-friendly, with a single button for sequential setting and direct access to the motor shaft for unlocking it when necessary.

CONSTRUCTION FEATURES

Cast iron pump body with cataphoresis paint coating and wet rotor motor. Steel motor casing, technopolymer impeller. Ceramic motor shaft on graphite bushings lubricated by the pumped liquid. Stainless steel rotor liner, stator liner and closing flange. Ceramic thrust ring. EPDM seal ring and brass bleeding plug.

Thanks to the internal protection of the motor, the pump does not require any overload protection.

CONTROL PANEL

The settings of the **EVOSTA 2**, **EVOSTA 3** circulators can be modified in the control panel on the fascia of the pump device. The pumps have nine settings that can be selected scrolling the **MODE** button. Three LED lights on the fascia show the current setting.
